- <sup>1</sup> If mental health information covered by the Lanterman-Petris-Short Act is requested to a third party by the patient, the Physician, licensed psychologist, social worker with a master’s degree in social work or marriage and family therapist, who is in charge of the patient must approve the release. If the release is not approved, the reasons therefore should be documented. The patient could most likely legally obtain a copy of the record by himself or herself and then provide the records to the third party, however.
- <sup>2</sup> If any of the HIPAA recognized exceptions to this statement applies, then this statement must be changed to describe the consequences to the individual of a refusal to sign the authorization when that covered entity can condition treatment, health plan enrollment, or benefit eligibility on the failure to obtain such authorization. A covered entity is permitted to condition treatment, health plan enrollment or benefit eligibility on the provision of an authorization as follows: (1) to conduct research-related treatment, (2) to obtain information in connection with a health plan’s eligibility or enrollment determinations relating to the individual or for its underwriting or risk rating determinations, or (3) to create health information to provide to a third party or for disclosure of the health information to such third party. Under no circumstances, however, may an individual be required to authorize the disclosure of psychotherapy notes.
- <sup>3</sup> Under HIPAA, the individual must be provided with a copy of the authorization when it has been requested by a covered entity for its own uses and disclosures.
